

Engaging Networks Dynamic Amount CSS Classes

This project gives you dynamic CSS classes to toggle visibility of elements based on the donation amount.

How to use

Add the script below to the page:

```
<script
  type="text/javascript"
  src="https://aaf1a18515da0e792f78-
c27fdabe952dfc357fe25ebf5c8897ee.ssl.cf5.rackcdn.com/44/en-show-if-
amount.js"
  defer
></script>
```

You can use our utility classes to hide/show a component based on giving amount:

`showifamount-{operand}-{value}`

Operands

- `lessthan` - Shows component when giving amount is less than **{value}** - Example: `showifamount-lessthan-10`
- `lessthanorequalto` - Shows component when giving amount is less than or equal to **{value}** - Example: `showifamount-lessthanorequalto-10`
- `equalto` - Shows component when giving amount is exactly equal to **{value}** - Example: `showifamount-equalto-10`
- `greaterthanorequalto` - Shows component when giving amount is greater than or equal to **{value}** - Example: `showifamount-greaterthanorequalto-10`
- `greaterthan` - Shows component when giving amount is greater than **{value}** - Example: `showifamount-greaterthan-10`
- `between` - Shows component when giving amount is between **{valuemin}** and **{valuemax}** - Example: `showifamount-between-10-100`

Frequency

You can also use the frequency of the donation to show/hide elements:

`showifamount-frequency-{frequency}`

- `onetime` - Shows component when donation is a one-time donation. - Example: `showifamount-frequency-onetime`
- `monthly` - Shows component when donation is a monthly donation. - Example: `showifamount-frequency-monthly`
- `quarterly` - Shows component when donation is a quarterly donation. - Example: `showifamount-frequency-quarterly`

- `semiannual` - Shows component when donation is a semi-annual donation. - Example: `showifamount-frequency-semiannual`
- `annual` - Shows component when donation is an annual donation. - Example: `showifamount-frequency-annual`

Animations

You can add some animations classes to make the transition between the two states look better:

- `animate-replace` - Will animate the content switch using scale
- `animate-vertical-slide` - Will animate the content switch using max-height

Examples

Show if amount is less than 10

```
<div class="showifamount-less-than-10">  
  This will show if the amount is less than 10  
</div>
```

You can also combine the frequency with the amount:

```
<div class="showifamount-less-than-10 showifamount-frequency-monthly">  
  This will show if the amount is less than 10 and the frequency is  
  monthly  
</div>
```

Show if amount is between 10 and 100 and frequency is annual

```
<div class="showifamount-between-10-100 showifamount-frequency-annual">  
  This will show if the amount is between 10 and 100 and the frequency is  
  annual  
</div>
```

Show if amount is between 10 and 100 and frequency is annual with animation

```
<div  
  class="showifamount-between-10-100 showifamount-frequency-annual  
  animate-replace"  
>  
  This will show if the amount is between 10 and 100 and the frequency is  
  annual  
</div>
```

IMPORTANT: This project only works with the Engaging Networks Pages.

Development

Your js code must be on the `src/*.ts` file. Styling changes must be on `src/sass`.

Install Dependencies

1. `npm install`

Deploy

1. `npm run build` - Builds the project

It's going to create a `dist` folder, where you can get the `en-show-if-amount.js` file and publish it.

Hot Module Reloading

1. `npm run start` - Starts the server with hot reloading enabled

Demo

<https://action.peta.de/page/111817/donate/1?mode=DEMO>

It's currently published on PETA Germany EN Account:
